

JEL classification codes

Articles in economics journals are usually classified according to the **JEL classification codes**, a system originated by the *Journal of Economic Literature*. The *JEL* is published quarterly by the American Economic Association (AEA) and contains survey articles and information on recently published books and dissertations. The AEA maintains EconLit, a searchable data base of citations for articles, books, reviews, dissertations, and working papers classified by JEL codes for the years from 1969. A recent addition to EconLit is indexing of economics-journal articles from 1886 to 1968^[1] parallel to the print series *Index of Economic Articles*.^[2]

There are 19 primary JEL categories:

- JEL: A - General Economics and Teaching
- JEL: B - History of Economic Thought, Methodology, and Heterodox Approaches
- JEL: C - Mathematical and Quantitative Methods
- JEL: D - Microeconomics
- JEL: E - Macroeconomics and Monetary Economics
- JEL: F - International Economics
- JEL: G - Financial Economics
- JEL: H - Public Economics
- JEL: I - Health, Education, and Welfare
- JEL: J - Labor and Demographic Economics

JEL code (sub)categories, including periodic updates, are referenced at Journal of Economic Literature (JEL) Classification System^[4]. Definitions of (sub)categories are at JEL Classification Codes Guide^[5] with corresponding examples of article titles linked to publication information, such as abstracts.

Articles in economics journals also list JEL codes (for example JEL: B12), facilitating their use across search engines. Comprehensive uses of JEL (sub)classifications include:
